PROFESSIONAL SUMMARY

Full-stack and AI engineer who builds production web apps, RAG pipelines and MCP servers with Next.js, TypeScript, Python and Node.js. Has shipped bilingual (English/Arabic) SaaS platforms, enterprise integrations (Dynamics 365, Odoo, Microsoft Entra) and LLM agents with role-based guardrails.

EXPERIENCE

Senior Software Engineer, GreenMint Labs (formerly Softwelve Pvt Ltd.), Pune *April 2025 – Present*

- Lead delivery for client products: turn stakeholder requirements into specs and architecture, then plan, assign and review work for a team of 3–4 (developers, a designer and testers).
- Use AI coding agents to ship ahead of estimates; an ERP AI assistant scoped at 3 weeks shipped in 8 days.

AI dashboard MCP server and enterprise intranet portal | *Next.js, Payload, MCP SDK, Dynamics 365, Azure Entra, Algolia*

- Built, in 10 days, an OAuth MCP server that lets Claude or ChatGPT build live Power-BI-style dashboards from 50+ Dynamics 365 tables from plain-language requests (e.g. "prepare the FY2026 finance report").
- Designed a secure AI-to-D365 bridge using each user's delegated Entra token, so D365 enforces that user's own security role; the AI can act only on allowlisted tables and every action needs the user's confirmation.
- Shipped, in about 2 months, a bilingual multi-tenant intranet for ~100 staff with Entra SSO, Algolia search and an ITSM ticketing module with multi-step approval workflows.

Odoo MCP server and WhatsApp AI assistant (sole author) | *Python, MCP, OAuth, Twilio, Docker*

- Built one service exposing 19 Odoo accounting, HR and timesheet tools to both a ChatGPT connector (Google/Entra OAuth) and a Twilio WhatsApp bot.
- Enforced role-based limits, own-record scoping and an audit log for every tool call; all writes require HR approval, so the model never writes on its own.

AI legal practice platform with RAG | *Next.js, Convex, Clerk, LLM/RAG, Docker*

- Built a legal practice manager (cases, clients, hearings, billing, client portal) with role-based access and audit logs, plus a tool-calling chat agent that manages records in plain language.
- Built an Arabic/English RAG pipeline with per-client data isolation, retrieval evaluation and cross-language fallback search, so lawyers get the exact passage instead of reading long documents.
- **Also delivered:** legal document SaaS with Maybank payments and an AI document editor; vendor portal with Qoyod sync and an Arabic WhatsApp agent; bilingual RTL websites on Payload CMS; an IoT energy-data receiver.

Digital Campaign Analyst, Vellko Media Pvt. Ltd., Bhopal *July 2024 – May 2025*

- Built React frontends and websites for a digital marketing company.
- Automated analytics and reporting workflows, cutting reporting time from 3 hours to 30 minutes (about 83% less).
- Built an Ongage browser extension that replaced one-at-a-time rule deactivation with a single bulk-disable flow.

PERSONAL PROJECTS

- **LyricsOverlay (C#/.NET):** Windows tray app that shows karaoke-style synced lyrics over every window without taking focus; ships as a single .exe.
- **Agent Pipeline Monitor (Next.js, React Flow, SSE):** live view of Claude Code multi-agent pipelines, streamed from hook events over Server-Sent Events.
- **SyncPlay (Next.js, Socket.IO):** real-time music rooms with synced playback, a shared queue and chat. More projects at bugholic.vercel.app.

SKILLS

Languages: TypeScript, JavaScript, Python, C#
Frontend: Next.js, React, Tailwind, shadcn/Radix, React Native/Expo, Arabic/English RTL layouts
Backend/Data: Node.js, Express, Payload CMS, Convex, Prisma, PostgreSQL, MongoDB, Socket.IO, REST/webhooks
AI: RAG, LLM tool calling, MCP servers with OAuth, Anthropic/OpenAI/OpenRouter APIs, Claude Code
Integrations/DevOps: Dynamics 365, Odoo, Azure Entra, Clerk, Stripe, Twilio, AWS S3, Docker, Vitest, Playwright, Postman

EDUCATION

Master of Computer Applications (MCA), Oriental Institute of Science and Technology, Bhopal (2023 – 2025)
Bachelor of Computer Applications (BCA), NRI Group of Institutions, Bhopal (2020 – 2023)
